1'

DETAILED ACTION

Election/Restrictions

1. This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

- I. Species I drawn to Figures 1 and 5 which includes an injection-system fuel return passage that returns fuel to the fuel tank.
- II. Species II drawn to Figures 2 and 6 which includes an injection-system fuel return passage that returns fuel to the oil pan.
- III. Species III drawn to Figure 3 which includes an injection-system fuel return passage that returns fuel to an upstream side of the injection pump.
- IV. Species IV drawn to Figure 4 which includes an injection-system fuel return passage that includes a three-way valve allowing returned fuel to be distributed to an upstream side of the injection pump and/or the oil pan
- V. Species V drawn to Figure 7 which an injection-system fuel return passage that returns fuel to the engine primary lubricated parts.
- VI. Species VI drawn to Figures 8 and 9 which includes an injection-system fuel return passage that includes a three-way valve allowing returned fuel to be distributed to the oil pan and/or the fuel tank.

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply

10/592,005 Art Unit: 3747

must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

- 2. The claims are deemed to correspond to the species listed above in the following manner:
 - I. Claims 2, 9-11 and 16-18 correspond to Species I.
 - II. Claims 3, 12 and 13 correspond to Species II.
 - III. Claims 4 and 5 correspond to Species III.
 - IV. Claims 6 and 7 correspond to Species IV.
 - V. Claims 14 and 15 correspond to Species VI

Of the above, none of the claims are generic.

3. The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: the above group of species lack a single general inventive concept since there is not a single "special technical feature" that defines over the prior art (see original Claim 1). The currently amended claims contain different structures for returning fuel from the injection system.

Application/Control Number:

10/592,005

Art Unit: 3747

Applicant is advised that the reply to this requirement to be complete must 4. include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

- 5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
- Any inquiry concerning this communication or earlier communications from the 6. examiner should be directed to Ka Chun Leung whose telephone number is (571) 272-9963. The examiner can normally be reached on 7:30AM - 4:30PM.

Application/Control Number:

10/592,005 Art Unit: 3747

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Stephen Cronin can be reached on (571) 272-4536. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
